SUMMARY

AI Engineer specialising in agentic AI, GenAI workflows, and automation. Currently a Python Backend & Hermes AI Developer at Gobind Trades, building AI-driven backend systems. Final-year CS student at NUML Lahore, with prior experience at Ebryx on ML pipelines and LLM-based workflows (LangChain, Llama 3.2). Also building Sentra Security Platform, an agentic AI code-review tool, as my final year project.

SKILLS

- **AI & Neural Networks:** Supervised/Unsupervised Learning, CNN, RNN, LSTM, GANs, Time Series, Scikit-learn.
- **Generative AI:** LangChain, LangGraph, MCP, Agentic AI, Autonomous Agents, Ollama (Llama 3.2, Gemma).
- **Workflow Automation:** n8n, Zapier, Webhook Triggers, Google Sheets Integration, WhatsApp Agent Integration.
- **Integration & Backend:** FastAPI, REST APIs, MongoDB, Node.js, Express.js.
- **Tech Stack:** Python, Java (OOP), React.js, Git/GitHub, GitHub Actions.

WORK EXPERIENCE

1. Python Backend & Hermes AI Developer · Gobind Trades **Sep 2026 - Present**
- Working on backend systems and AI-driven tooling using Python, FastAPI, and PostgreSQL
- Contributing to agentic AI infrastructure supporting internal automation and workflows

2. Ebryx (Pvt) Ltd , AI/ML Engineer Intern **Oct 2025 - Sep 2026**
- Built end-to-end ML pipelines and deep learning models (CNN, LSTM) and developed GenAI workflows using LangChain and Llama 3.2 via FastAPI for real-time inference.

3. Ebryx (Pvt) Ltd , Mern Stack Developer Intern **July 2024 - Feb 2025**
- Developed responsive UIs and integrated REST APIs for product listings, order flow, and an admin panel during a full-stack internship, strengthening my MERN stack and API integration skills.

PROJECTS

- **Sentra Security Platform (FYP, In Progress):** Agentic AI platform for offline secure code review with a VS Code extension; local LLM via Ollama & LangGraph.
- **Teacher-Personal-Dashboard (MERN):** Full-stack dashboard for teachers to manage classes, students, timetable, and attendance.
- **AI_Content_Generator (FastAPI + LangChain + Gemini):** Generates content from a topic prompt through a full AI pipeline, deployed live.
- **Speech-Translator (FastAPI + React):** Real-time speech translation app: speak in any language, get translated text plus a spoken translation back.
- **WhatsApp Restaurant Agent (n8n + MERN):** Agent saves WhatsApp orders to a database, notifies admin, and emails an auto-invoice via Gmail; web app for admin to manage menu and orders.

EDUCATION

BS-Computer Science - NUML University Lahore **Sep 2023 - June 2027**
- Focused on software development, data structures, and web technologies

Intermediate in Pre-Engineering - Punjab College,Lahore **Nov 2021 - May 2023**
- Developed a solid base for further studies in technology and engineering fields
